QUAD™

Skin Rejuvenation Skin Toning

FOR A SKIN
THAT LOOKS
YOUNGER AND
HEALTHIER

QUAD™

skin stimulation

Day by day, the effects of time, sun and wind begin to show on our skin in the form of lines, wrinkles, spots and slackened skin tissues.

Many people are looking for a safe and easy way to eliminate fine wrinkles, irregularities and slack skin.

Thankfully, the new QUAD™-Bipolar and Hexapolar Radiofrequency technology helps us to treat these skin blemishes in quick, easy and effective sessions.

Who is most likely to benefit from treatment with QUAD™?

The most suitable candidates are those who have:

- facial wrinkles and fine lines
- slack facial and neck contours
- slack skin following pregnancy, weight-loss or liposuction

What can we treat with QUAD™

Face:

facial lines and fine wrinkles, neck wrinkles, fine lines around the lips, double chins, skin smoothing.

Eyes:

eyelid remodelling, "crow's feet", eye-zone pouches and dark rings

Decolleté and bust:

restoring decolleté skin tone, breast-tissue toning.

Body:

toning and remodelling the inner arms, waistline, stomach and thighs.

Key Benefits

- Younger-looking skin, less wrinkles, firmer facial contours
- Firmer skin tone
- Visible results after first treatment
- No "down time" or pain
- Short treatment sessions (20-40 minutes) suitable at any time, all through the year

How it works

QUAD™ is a wholly Italian technological concept, dedicated to anti-ageing and skin improvement. Radiofrequency is used to stimulate the production of new Collagen and Elastin proteins: the Radiofrequency energy flow causes controlled heating in the target tissues, which "breaks" the collagen fibres from the inside, thus stimulating the fibroblasts/skin cells to produce fresh collagen with consequent renewal and rejuvenation of the treated skin.
